

Akamai NetStorage File Manager

Overview

NetStorage File Manager is provided as part of Akamai's EdgeControl Management Center to enable the upload and management of stored files such as digitized files, software, video, or other large objects. File Manager simplifies the management and distribution of content for customers through an easy-to-use graphical interface.

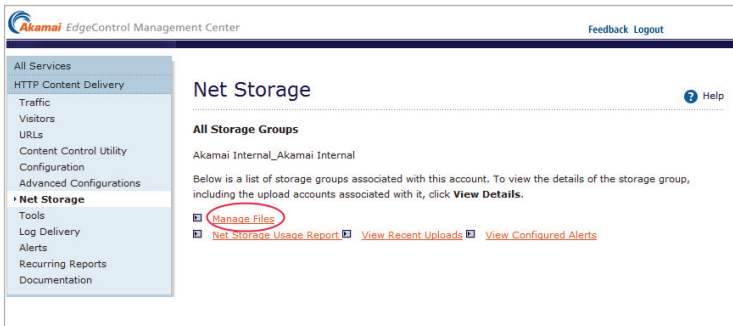

Alternatively, you can leverage your current e-business processes or enterprise network management systems to monitor and control your content and applications on the Akamai EdgePlatform. EdgeControl visibility and control tools can be easily integrated with your e-business processes using the EdgeControl Web Services, which allows SOAP (Simple Object Access Protocol) based access or the EdgeControl MIB (Management Information Base) which allows SNMP (Simple Network Management Protocol) integration with your network management tools. Akamai supports the following Enterprise Network Management Systems: OpenNMS, HP OpenView™, IBM/Tivoli NetView™, CA UniCenter™ and BMC Patrol.

Key Features

NetStorage File Manager enables customers to manage files residing on Akamai's NetStorage infrastructure. File Manager is activated automatically as part of NetStorage and provides a complete set of capabilities to ensure the effective management of your files. It allows you to:

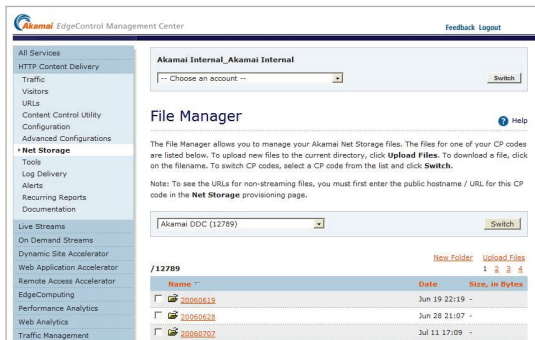

- Upload files from a standard web browser
- Move, rename and delete files
- Create and delete folders
- Browse directories of files by Content Provider (CP) Code
- Manage read/write access rights
- Link to streaming files and generation of end-user facing URLs that enable access streams from the Akamai network

File Manager is easily accessible from the NetStorage EdgeControl Management Center.

The screenshot shows the Akamai EdgeControl Management Center interface. On the left is a navigation menu with categories like All Services, Net Storage, and Tools. The main content area is titled 'Net Storage' and shows 'All Storage Groups' with a list of storage groups. A 'Manage Files' link is highlighted with a red circle.

Once File Manager is accessed, the GUI interface enables you to easily navigate and manage your file uploads.

The screenshot shows the Akamai EdgeControl Management Center interface with the 'File Manager' section active. It displays a table of files with columns for Name, Date, and Size, in Bytes. The table contains three rows of file data.

Name	Date	Size, in Bytes
20050613	Jun 19 22:19	-
20050628	Jun 28 21:07	-
20060202	Jul 11 17:09	-

Benefits To Your Business

By simplifying the management and uploading of files to Akamai's NetStorage, File Manager can help reduce your costs by improving your business productivity.

Benefits for Manager of NetStorage Content

The manager responsible for uploading content to NetStorage benefits greatly from File Manager. Benefits Include:

- Improved productivity through more efficient management of NetStorage content via an easy to use Web interface
- Elimination of the need for a separate file management tool for straightforward file management tasks
- Less time spent training on third party file management tools
- Simplifying the management of an individual or group's access to NetStorage by leveraging the same user entitlements that are pre-configured as part of the EdgeControl management center

Results

Your business will benefit from.

- Higher productivity through increased efficiency
- Reduced operational costs
